

(An ISO 9001:2015 certified company)

# India's Trusted Industrial Control Panel & Switchboard Builder

# About Company

## Absolute Motion Pvt Ltd

Control Panel & Switchboard builders making your job easier.

Coordinating the electrical scope for industrial process equipment often presents unique challenges. At Absolute Motion, we specialize in simplifying this process through clear communication, proactive planning, and reliable execution. As pioneers in control panel and switchboard manufacturing, We are dedicated to delivering top-notch, Indian-made quality backed by engineering expertise and manufacturing excellence.

Our solutions are tailored to keep your projects on track, enabling seamless integration with your processes and ensuring optimal performance. With Absolute Motion as your trusted partner, you can focus on meeting your deadlines and achieving outstanding results, while Absolute Motion work tirelessly to support your success at every stage.

# Trusted Expertise

## Why Choose Absolute Motion?

### Extensive years of industry experience

With extensive of industry expertise, Absolute Motion have honed our skills in delivering customized control panel solutions that meet the exact specifications of our clients. From small-scale projects to large-scale industrial systems, Absolute Motion have the experience to deliver high-quality results.

### 600+ Systems Programmed

Expertise in programming over 600 systems, leveraging PLC, HMI, and SCADA technologies to drive automation, optimize performance, and enhance operational efficiency across industries.

### Proven Expertise Across Leading Brands

Absolute Motion partners with industry leaders like Schneider Electric, Mitsubishi, Danfoss, Omron, Wago, Exor, Lenze, Phoenix Contact, Allen Bradley, Panasonic, and INVT Electric. Our expertise in electrical control systems and automation ensures tailored solutions, seamless integration, and enhanced productivity, establishing us as a trusted industry partner.

### 800+ Projects Completed

With a diverse portfolio of over 800 projects, Absolute Motion has delivered excellence across sectors including Pharmaceuticals, Food & Beverages, HVAC, Water & Chemical Plants, Infrastructure, and more, adhering to the highest standards of quality and performance.

# Qualified & Skilled Engineering Team

## Meet Our Qualified Engineers

### 40+ Elite Engineers Driving Excellence

Absolute Motion team comprises over 40 highly qualified engineers with deep expertise in electrical engineering, automation, and industrial control systems. Their collective knowledge allows us to take on complex challenges and deliver results that exceed expectations.

### Expertise in Design, PLC, HMI, & SCADA Programming

Our engineers are proficient in designing custom electrical control panels and programming advanced PLC, HMI, and SCADA systems. Absolute Motion understand the intricacies of industrial automation and ensure that every system we design is built to deliver superior performance.

### Comprehensive Technical Support & Onsite Commissioning

Beyond the initial installation, Absolute Motion team provides extensive support to ensure smooth operations. Absolute Motion offer ongoing maintenance, troubleshooting, and commissioning services to optimize the performance of every system we install.

# In-house Manufacturing Facility

**Absolute Control, Superior Quality**

## Comprehensive Process Management

From initial design through to fabrication, assembly, wiring, programming, testing, and commissioning, Absolute Motion manage every step in-house. This ensures tighter quality control, faster lead times, & the ability to respond quickly to any adjustments.

## Real-Time Factory Acceptance Testing

Before any system leaves our facility, Absolute Motion conduct rigorous factory acceptance testing in real-time. This ensures that every switchboard meets performance and safety standards, giving clients peace of mind that their system will function flawlessly.

## Custom-Engineered Solutions

Unlike many competitors who outsource key parts of their processes, Absolute Motion maintains complete control over the design, manufacturing, and programming of each electrical switchboard. This enables us to provide custom-engineered solutions that are tailored to meet our clients' specific needs.

## Consistent Quality & Reduced Risk

Our in-house approach minimizes the risk of errors, ensuring top-tier quality and performance. This translates into greater reliability for our clients and reduces the likelihood of costly delays or malfunctions.

# Production Capacity

## In-House Powder Coating Facility

### Key Features

8 Tanks Pre-Treatment Process  
with Hot Degreasing for  
enhanced surface preparation

2 Powder Coating Booths  
ensuring high-efficiency  
coating application

### Pre-Treatment Tank Dimensions

3000 x 1200 x 1500  
mm Oven Size

3600 x 2000 x 2000 mm  
Production Capacity

Able to process  
**2,00,000 sq. ft.**  
per month of  
coated material

Processing  
over **200 Tons**  
of material per month

**39,000 sq. ft.**  
Working area

**165 personnel**  
Driving production  
efficiency

Equipped with  
state-of-the-art  
imported machines

### List of Machineries

| Sr. No | Machine Name                    | Make            | Capacity     |
|--------|---------------------------------|-----------------|--------------|
| 1      | Laser Machine                   | Mitsubishi      | 2 KW. & 3 KW |
| 2      | Laser Machine                   | Yawei           | 700W         |
| 3      | Laser Machine                   | Mehta           | 1.5 KW       |
| 4      | CNC Punching Machine            | Muratec         | 18 Ton       |
| 5      | CNC Punching Machine            | Trumph          | 20 Ton       |
| 6      | CNC Bending Machine             | Yawei           | 110 Ton      |
| 7      | CNC Bending Machine             | Yawei           | 80 Ton       |
| 8      | NC Bending Machine              | YSD             | 50Ton        |
| 9      | CNC Bending Machine             | Amada           | 35 Ton       |
| 10     | CO2 welding machine = 6 No's    | ESAB            | 250 A        |
| 11     | Aragon Welding Machine = 2 No's | Panasonic       | 300A         |
| 12     | Spotting Machine                | Comptech Genero | 30 KVA       |
| 13     | Hydraulic Press Machine         | Bharat          | 20 Ton       |

### Cutting Machine Infrastructure

TRUMPF PUNCHING M/C 3000

MITSUBISHI LASER M/C. (2KW)

Yawei Laser M/C 700W

MURATECH CNC PUNCH PRESS

### Bending Machine Infrastructure

NC Press Brake 50T

CNC Press Brake 80 T

CNC Press Brake 110T

TRUEBEND 5130

### Machines

CO2 WELDING

DRILL MACHINE

SURFACE GRINDER

ARC WELDING

### Pretreatment Area 8 Tanks Process

### Batch Type Oven

# The Absolute Process

## How Absolute Motion Ensure Success: 8-Step Process

# The Absolute Process

## Estimation

- Fast, accurate proposals tailored to your needs. Highly detailed tender and project costings.
- Helpful presale support from experienced engineers.

## Design

- Creation of comprehensive drawing packs for client approval.
- Word-Extensive mechanical and electrical CAD ensures high quality drawings.

## Manufacturing

- 100% in-house sheet metal manufacturing including laser cutting, folding, welding, and powder coating ensures shorter lead times and consistent quality.
- Custom fabrication ensures tailored solutions.

## Joint Venture with JE Mechanicals

- Absolute Motion Pvt Ltd has a joint venture with JE Mechanicals
- A leading manufacturer of high-quality panel enclosures in both Mild Steel (MS) and Stainless Steel (SS), featuring a state-of-the-art in-house powder coating facility. This partnership enhances our capabilities in delivering robust, custom-built enclosures with premium finishing

# Assembly & Wiring

## Expert Craftsmanship

Our assembly and wiring are carried out by skilled electricians and trained apprentices, ensuring that every connection meets the highest standards of quality and safety.

## Automated Wiring Preparation

Utilizing automated systems for wiring preparation allows us to enhance both the quality and speed of our processes, reducing the likelihood of human error and increasing efficiency.

## Precision Engineering

Our computerized workstations are designed for maximum accuracy, enabling precise wiring layouts and connections. This technology ensures that each project is executed with meticulous attention to detail.

## Continuous Training

Our team undergoes ongoing training to stay updated on the latest industry standards and technologies, ensuring that Absolute Motion consistently deliver superior results in every project.

# Software Development

## Proven Track Record

Over the past 5 years, Absolute Motion have successfully delivered 600+ projects, encompassing more than 120,000 I/O points. This extensive experience demonstrates our capability to handle complex systems across various industries.

## Tailored Expertise

Our team of experienced programmers customizes each solution to seamlessly meet your unique process requirements. With deep technical knowledge, Absolute Motion ensure optimized control and precision in every program.

## In-House Development & Testing

Every step, from programming to rigorous testing, is executed 100% in-house. This control allows us to ensure high standards of quality, consistency, and quick response times, minimizing risk and maximizing reliability for your projects.

# The Absolute Process

## Quality Check & Functional Test

- Every switchboard undergoes rigorous testing to ensure 100% quality.
- Multistep quality checks and thorough functional testing save time & money.
- PLC testing and debugging ensure reliability.

## Commissioning & Technical Support

- On-site or remote commissioning by experienced engineers.
- Fast and helpful support ensures quick troubleshooting.
- Nationwide coverage for technical support.

# Compliance and Associations

## ISO9001/ 2015: Quality Management System (TÜV Nord)

Demonstrating a strong commitment to quality with a robust Quality Management System, ensuring excellence in every stage of control panel and switchboard manufacturing.

## Driving Operational Excellence

- **5S for Workplace Excellence:** Applying 5S principles to maintain a safe, efficient, and organized manufacturing environment.
- **Skill Matrix for Workforce Development:** Focusing on continuous skill enhancement and compliance to ensure precision and expertise in production processes.

## IEC-Compliant Switchboard Solutions

Certified partner of Schneider Electric, delivering Prisma and Blokset solutions compliant with IEC 61439-1 & 2 standards, supporting ratings up to 7000A for safe, reliable, and high-performance switchboards.

## Commitment to Quality & Compliance

- **Continuous Improvement:** Implementing **Kaizen** methodologies to enhance processes, ensuring consistent quality and innovation in panel production.
- **Inventory Efficiency:** Streamlined inventory management using **Kanban** principles to minimize waste and ensure material availability for seamless manufacturing.

## Association - COSMA (Control Panel and Switchgear Manufacturers Association)

Absolute Motion are proud to be a **member of COSMA**, a prestigious association that brings together **control panel and switchgear manufacturers** across India. COSMA represents a family of over **450 members**, spread across **20 states and union territories**

### Nationwide Presence & Growth

COSMA has evolved into a platform where members share knowledge & best practices, contributing to the collective advancement of the industry.

### A Strong Network of Industry Leaders

COSMA is a unified community where **friendly competitors** collaborate, learn, and grow together, fostering an environment of mutual support.

### A Thriving Ecosystem

COSMA has transformed competitors into a close-knit family, enabling members to thrive through cooperation and shared success. Our participation in COSMA reflects our commitment to fostering a **harmonious, innovative, & collaborative ecosystem** within the **Control Panel and Switchgear Manufacturing** industry.

# Association - RMB (Rotary Means Business)

Absolute Motion are proud to be a member of **Rotary Means Business (RMB)**, a dynamic fellowship of **Rotarians** who are committed to supporting each other's businesses & expanding opportunities globally. RMB fosters collaboration among business professionals who believe in the power of Rotary's global network to drive mutual success

## Solution Partners

**OMRON**

Revolutionizing industrial processes with cutting-edge automation solutions, Omron enhances productivity and efficiency across various sectors. Their innovative technologies, including robotics and AI, ensure seamless integration and optimal performance in manufacturing environments.

**EXOR**

Exor's Human-Machine Interface (HMI) and Industrial PC (IPC) solutions integrate seamlessly with IoT technologies, providing robust and scalable platforms for industrial automation. Their advanced systems enhance operational efficiency, enabling real-time data monitoring and control across various industrial applications.

**WAGO**  
INNOVATIVE CONNECTIONS

WAGO offers innovative automation solutions that enhance connectivity and efficiency in industrial environments. Their cutting-edge technologies, including I/O systems and controllers, ensure reliable and flexible automation for a wide range of applications.

 **COPADATA**

COPA-DATA's SCADA solutions, powered by zenon software, offer comprehensive monitoring and control for industrial processes. Their user-friendly interface and advanced analytics capabilities ensure efficient and reliable operations across various industries.

**Danfoss**

Danfoss offers high-performance drives that optimize energy efficiency and enhance the control of electric motors in various industrial applications. Their innovative solutions ensure reliable operation, reduced energy consumption, and improved productivity.

**invt**

INVT provides advanced automation solutions that enhance efficiency and productivity in industrial processes. Their comprehensive range of products, including drives, PLCs, and HMIs, ensures seamless integration and reliable performance across various applications.

**FLEXEMATIC**

Flexematic's IoT solutions enable seamless connectivity and intelligent automation across industrial systems. Their innovative technologies provide real-time data insights and remote monitoring capabilities, enhancing operational efficiency and decision-making.

**Schneider**  
Electric

Schneider Electric's Prisma range offers modular and scalable solutions for low-voltage electrical distribution, ensuring safety and reliability. Their innovative designs facilitate easy installation and maintenance, enhancing operational efficiency in various applications.

# Prisma iPM by schneider Electric

Schneider Electric's modular, pre-fabricated low voltage distribution system for industrial and commercial use. It offers robust performance, easy installation, high safety standards, and is compliant with IEC 61439-1 & 2, supporting applications up to 4000A.

Simple Implementation of command-control and communication capabilities.

Improved building energy management for greater comfort and safety.

## Durable & Cost-Efficient:

Reinforced design with cost-saving features like Linergy LGYE coupling kit & Masterpact connections

## Local Support

Schneider Electric offers **worldwide, localized support** for troubleshooting and maintenance.

## Proven Reliability:

- **700,000+ installations worldwide.**
- Trusted by customers globally for its **safety, efficiency, & durability.**

Flexible and compact design 43% footprint saving.

Tertiary & industrial buildings

Residential

Hotels

Hospitals

Infrastructure

Commercial Buildings

Retail

## Applications

Main and secondary low voltage distribution & control switchboards

## Why Choose Prisma iPM?

- **Efficiency:** Reduced installation time and operational costs.
- **Safety:** Meets the highest industry standards for protection and compliance.
- **Scalability:** Easily expandable as per your evolving business needs.

## Project Highlights (1/3)

- **Application:** Reactor system
- **Industry:** Chemical
- **Location:** Pidilite industries, Wada
- **IOs:** 224 DI + 96 DO + 56 AI + 16 AO
- **Functionality:** Redundant of Controller, SMPS, Communication
- **Enclosure Dimensions:** 1600mm x 1600mm x 400mm
- **MOC:** MS Powder coated RAL7032
- **IP Rating:** IP 54
- **Solution partners:** Wago, Zenon

- **Application:** Primary HVAC System
- **Industry:** HVAC
- **Location:** Venue Hospital, Surat
- **IOs:** 16 DI + 18 DO + 6 AI + 1 AO
- **Functionality:** Communication with existing BMS system
- **Enclosure Dimensions:** 1800mm x 1600mm x 400mm
- **MOC:** MS Powder coated RAL 7035
- **IP Rating:** IP 54 with Canopy
- **Solution partners:** INVT, Danfoss

- **Application:** Booster pump system
- **Industry:** Water
- **Location:** Taj Majesty, Vadodara
- **IOs:** 16 DI + 18 DO + 6 AI + 1 AO
- **Functionality:** Communication with existing BMS system
- **Enclosure Dimensions:** As per motor ratings and number of pumps
- **MOC:** MS Powder coated RAL 7035
- **IP Rating:** IP 42
- **Solution partners:** INVT, Yasakawa

## Project Highlights (2/3)

- **Application:** Manual operation for RO System
- **Industry:** Water
- **Location:**
- **IOs:** N/A
- **Functionality:** Manual control for RO plant
- **Dimensions:** 2000mm x 1200mm x 600mm
- **MOC:** MS Powder coated RAL 7032
- **IP Rating:** IP 55 with Canopy
- **Solution partners:** N/A

- **Application:** VAM transfer system
- **Industry:** Chemical
- **Location:** Pidilite Industries, Falna
- **IOs:** 20 DI + 12 DO + 4 AI + 4 AO
- **Functionality:** Auto control of VAM transfer system
- **Dimensions:** 1000mm x 800mm x 300mm
- **MOC:** SS304
- **IP Rating:** Atex Zone II
- **Solution partners:** Exor

- **Application:** Conveyor system
- **Industry:** Food and beverage
- **Location:** Gekson Air & Chanin, Guwahati
- **IOs:** 60 DI + 80 DO + 10 VFDs
- **Functionality:** Food and beverage transfer conveyors
- **Dimensions:** 2000mm x 1200mm x 600mm
- **MOC:** MS Powder coated RAL 7032
- **IP Rating:** IP 55
- **Solution partners:** GE Fanuc, Danfoss, Exor

## Project Highlights (3/3)

- **Application:** OEE
- **Industry:** Packaging
- **Location:** Naxnova, Nalasopara
- **IOs:** 8 DI + 4 DO
- **Functionality:** Integration of Machine and IoT
- **Dimensions:** 600mm X 600mm X 210mm
- **MOC:** MS Powder coated RAL 7032
- **IP Rating:** IP 65
- **Solution partners:** Wago, Exor

- **Application:** 6 head powder filling machine
- **Industry:** Pharma
- **Location:** : Hindustan Unilever Ltd., Coimbatore
- **IOs:** 40 DI + 40 DO, 8 Servo drives, 19 VFDs
- **Functionality:** Weigh based 6 head powder filler
- **Dimensions:** 1400mmx1600mm x 400mm
- **MOC:** MS Powder coated RAL 7035
- **IP Rating:** IP 42
- **Solution partners:** INVT, Omron, Zenon

- **Application:** PWD system
- **Industry:** Water
- **Location:** FVE international, Uganda
- **IOs:** 32 DI + 32 DO + 12AI
- **Functionality:** Auto control for RO system
- **Dimensions:** 1800mm x 800mm x 400mm
- **MOC:** SS 316
- **IP Rating:** IP 54
- **Solution partners:** Siemens
